Funny Monster Feelings Activity Cutouts

Funny Monster Feelings Activity Cutouts are a fun, interactive way for children to explore emotions through play. Each monster features a different facial expression and feeling, helping children recognise and talk about emotions. The monster mouths can be cut out to create a feeding activity, allowing children to feed the monsters using sensory materials, pom-poms, counters, or other small play items.

These versatile cutouts can be used in sensory trays, attached to paper cups, or incorporated into imaginative play activities. Children can sort, feed, match, and discuss feelings while developing emotional awareness, fine motor skills, and creativity through hands-on learning.
