Funny Faces & Feelings Match-Up-Activity Cutouts

This interactive cut-and-paste activity helps children explore emotions, facial expressions, and animal recognition through hands-on creative play. Children can cut out and match different eyes, noses, and mouths to create funny or realistic faces while learning to identify feelings and emotions. The animal-themed pieces encourage children to recognize animals by their facial features and discuss which animal each part belongs to. This activity promotes emotional awareness, creativity, communication skills, and fine motor development in a fun and engaging way.
